III. Fire Safety Tips and Announcements

Fire Safety Tip: Electrical Safety Tips

- Plug one heat-producing appliance (coffee maker, toaster, etc.) into a wall receptacle outlet at a time.

- Major appliances (refrigerators, dryers, stoves, etc.) should be plugged directly into a wall receptacle outlet. Extension cords and power taps or strips should not be used.
- Check electrical cords to ensure they are not running across doorways or under carpets.
- Extension cords are intended for temporary use. Have a licensed electrician install additional receptacle outlets so you do not have to use extension cords.
- Ensure that electrical work is performed by a licensed electrician.
